# EMPro 2017 Update Release Notes

## EMPro 2017 Update 0.1 Release Notes

### Version

330.100

### Install Instructions

EMPro 2017 Update 0.1 is a full installer. You can install this update over an existing EMPro 2017 installation. For more information, refer to the [installation instructions](#) on the download page.

### Platform Support

- **Supported Platforms:** [Windows and Linux 64-bit](#).

### Issue Addressed

#### EMPro

- A python function (Assembly\_setitem\_) that was no longer available in EMPro 2017 has been restored.
- Fixed an issue that could cause EMPro to hang while saving a project.

#### FEM

- Fixed an issue in the FEM mesh refinement process when objects of the same materials are merged.
- Fixed a remote FEM simulation license issue.
- Reduced the memory consumption of FEM simulations for large designs with many ports. This may increase the simulation time by 10-15% depending on the machine and design.
