

Lenovo™ ThinkCentre® Desktops

Robust and flexible —
ideal for clinical demands

Designed to perform across the healthcare enterprise, these powerful desktop computers offer the ingenuity providers need to keep pace with the pressures of patient care — fast access to electronic medical data and images, quiet and clutter-free to minimize distractions, and built to withstand the rigors of demanding workflow requirements.

- **Top performance**, powered by Intel® Core™ processors, supports major healthcare apps
- **Intuitive design** for a trusted, consistent end-user computing experience among clinical teams
- **Secure access** to patient data that helps ensure HIPAA compliance
- **Optimized for space and energy savings** in crowded areas of hospital, clinic or office

Health

Lenovo™

Optimal for a wide variety of healthcare settings, the Lenovo ThinkCentre desktop family combines media-rich functionality with secure, dependable performance.

					
	THINKCENTRE M600 THIN CLIENT	THINKCENTRE M710 TINY DESKTOP	THINKCENTRE M910x TINY DESKTOP	THINKCENTRE TINY-IN-ONE 22/24	THINKCENTRE X1 ALL-IN-ONE
Perfect for:	Anywhere in healthcare. This ultra-sleek form factor fits just about any space and provides reliable enterprise-level performance in a virtualized desktop infrastructure (VDI) setting.	Space-starved areas where desk real estate is at a premium. Whether in admissions, billing or at a nurses' station, this small desktop delivers big performance.	High-traffic, high-use demanding healthcare settings where power, dependability and performance are non-negotiable.	Providers who need a flexible, customizable computing solution that can be modularly configured to match workload demands, space constraints and healthcare staff user preferences.	Enhanced security and access to digital patient files and clear viewing capability in a slim-as-a-notebook form factor that boasts a brilliant widescreen antiglare display.
